This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Global Focused Growth Equity Fund

a sub-fund of T. Rowe Price Funds OEIC  
Class C Acc (ISIN: GB00BD446774)

Authorised Corporate Director: T. Rowe Price UK Limited

## Objectives and Investment Policy

**Objective** To increase the value of its shares through growth in the value of its investments.

**Portfolio securities** The fund is actively managed and invests mainly in a diversified portfolio of shares which, in the opinion of the investment manager, have the potential for above average and sustainable rates of earnings growth. The companies may be anywhere in the world, including emerging markets. The fund may use derivatives for hedging and efficient portfolio management.

**Investment process** The investment manager's approach is to:

- Identify "best ideas" by assessing companies in a global sector context, using a bottom-up approach to create a focused portfolio of typically 60-80 holdings.
- Utilise a proprietary global research platform using fundamental analysis to identify companies with superior and sustainable growth prospects, and improving fundamentals.
- Integrate macroeconomic and local market factors in stock selection decisions.
- Measure valuation appeal against the local market and broad sector opportunity set.
- Invest in a broad range of stocks across all capitalizations, incorporating developed and emerging markets.
- Assess environmental, social and governance ("ESG") factors to identify those considered most likely to have a material impact on the performance of the holdings or potential holdings in the fund's portfolio.

**Designed for** Investors who typically plan to invest for five years or more.  
**Fund reference currency** GBP

**Primary Benchmark** MSCI All Country World Index Net

**Secondary Benchmark** MSCI All Country World Growth Index Net

**Benchmark Use** Investors may use these benchmarks to compare the fund's performance. The primary benchmark has been selected because it is similar to the investment universe used by the investment manager and therefore acts as an appropriate comparator overall. The secondary benchmark has been selected to reflect the growth style of the fund and investors may use it as additional information to compare the fund's performance.

The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmarks and has complete freedom to invest in securities that do not form part of the benchmarks.

### Other Information:

*Income generated by the fund is reinvested and included in the value of its shares.*

*Orders to buy, switch and redeem shares are ordinarily processed any day that is a full bank business day in England and Wales except on days when markets, in which a substantial amount of the portfolio is traded, are closed or the day before. Please consult the following link <https://www.troweprice.com/literature/public/country/gb/language/en/literature-type/trading-calendar/sub-type/oeic>, for dealing calendar and any applicable exceptions.*

*Orders received and accepted by 12:00 noon on a business day will generally be processed that day.*

## Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.

The lowest category does not mean a risk-free investment.

The fund is in the category shown because it invests in a segment of the market where volatility is moderately high.

The fund's risk level reflects the following:

- As a class, stocks carry higher risks than money market securities and bonds.

### MAIN RISKS TYPICALLY ASSOCIATED WITH ORDINARY MARKET CONDITIONS

The fund's main risks are at least partially reflected in the risk/reward number. The most important of these risks are:

**Emerging markets** are less established than developed markets and therefore involve higher risks.

**Investment Fund** involves certain risks an investor would not face if investing in markets directly.

**Style risk** may impact performance as different investment styles go in and out of favor depending on market conditions and investor sentiment.

### MAIN RISKS TYPICALLY ASSOCIATED WITH UNUSUAL MARKET CONDITIONS

Unusual market conditions or large unpredictable events can amplify the fund's main risks. They can also trigger other risks, such as:

**Country risk China** Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market.

**Operational risk** may cause losses as a result of incidents caused by people, systems, and/or processes.

A more detailed description of the risks that apply to the fund is set out in the section "Risk Descriptions" in the prospectus.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.77%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The **entry** and **exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your distributor or financial adviser.

The **ongoing charges** figure is based on expenses as at 1st September 2023. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units/shares in another collective investment undertaking.

**For more information about charges, please see the fund's prospectus, which is available at [troweprice.com](https://www.troweprice.com).**

## Past Performance

The past performance indicated is not a reliable indicator of future performance.

The past performance calculation includes all ongoing charges, but excludes any entry charge applied.

The fund and class started to issue shares in 2017.

Past performance has been calculated in GBP.

When a share class is hedged to a different currency, a hedged version of the benchmark (where available) will be used by the Authorised Corporate Director for the performance comparison.

## Practical Information

The fund's depositary is JP Morgan Europe Limited.

Further information about the fund, copies of its prospectus, latest annual report and any subsequent half-yearly report can be obtained, free of charge, from JP Morgan Europe Limited, or at [troweprice.com](https://www.troweprice.com). These documents are available in English and certain other languages (fully detailed on the website).

The latest share prices can be obtained from JP Morgan Europe Limited.

The tax legislation of the UK, the fund's home Member State, may have an impact on the personal tax position of the investor.

T. Rowe Price UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the fund.

Investors in the fund have the right to exchange their shares in the fund for shares in another sub-fund. Information about how to exercise this right is contained in the section of the prospectus entitled "Conversion of Shares".

This document describes a sub-fund of T. Rowe Price Funds OEIC and the prospectus and periodic reports referenced in this document are prepared for the whole of the T. Rowe Price Funds OEIC. The assets and liabilities of each sub-fund are segregated by law, which means that third party creditors have recourse only to the sub-fund having incurred the liability.

Investors can obtain information about the other classes of the fund in the appendix to the prospectus describing this fund.

The details of the up-to-date remuneration policy statement setting out the key remuneration elements, including, but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee, are available on the website [https://www.troweprice.com/content/dam/trowecorp/Pdfs/TPRUK\\_Remuneration\\_Policy.pdf](https://www.troweprice.com/content/dam/trowecorp/Pdfs/TPRUK_Remuneration_Policy.pdf). A paper copy of this information is available free of charge upon request from the Authorised Corporate Director.

# Goldman Sachs Emerging Markets Equity Portfolio (the “Portfolio”)

## Class I Shares (GBP)

(ISIN: LU1390214952)

## a sub-fund of Goldman Sachs Funds (the “Fund”)

The Portfolio is managed by Goldman Sachs Asset Management B.V. (the “Manager”), part of Goldman Sachs group of companies.

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Objectives and Investment Policy

- The Portfolio seeks to provide capital growth over the longer term.
- The Portfolio will mostly hold shares or similar instruments relating to emerging market companies. Such companies are either based in or earn most of their profits or revenues from emerging markets. The Portfolio may also invest in companies which are based anywhere in the world.
- The Portfolio will not invest more than one-third of its assets in bonds issued by corporate or government entities, convertibles (securities that can be converted into other types of securities), money market instruments and non-share related instruments.
- The Portfolio may invest, up to 30%, in mainland China equity securities directly through the Stock Connect scheme or the Renminbi qualified foreign institutional investor program, or indirectly through access products.
- The Portfolio may use derivatives for efficient portfolio management purposes, to help manage risks and for investment purposes in order to seek to increase return. A derivative instrument is a contract between two or more parties whose value depends on the rise and fall of other underlying assets.
- Shares in the Portfolio may be redeemed daily (on each business day) on demand.
- The Portfolio is actively managed and references the MSCI Emerging Markets Index (Net TR) (GBP) (the “Benchmark”) for the purposes of setting discretionary internal risk thresholds which may reference deviations from the Benchmark.
- The Investment Adviser has full discretion over the composition of the assets in the Portfolio. While the Portfolio will generally hold assets that are components of the Benchmark, it can invest in such components in different proportions, and it can hold assets which are not components of the Benchmark. Therefore returns may deviate materially from the performance of the specified reference Benchmark.
- The Portfolio promotes environmental and/or social characteristics and, while it does not have a sustainable investment objective, it will hold a minimum proportion of sustainable investments as further detailed in the pre contractual disclosure for the Portfolio contained within the Prospectus. As part of its investment process, the Investment Adviser will implement a multi-strategy approach to ESG which may consist of the application of exclusionary screens and the integration of ESG factors alongside traditional factors.
- Income (net of expenses) is distributed on an annual basis.
- The Portfolio currency is USD. The share class currency is GBP.
- **For full investment objective and policy details see the Prospectus.**

## Risk and Reward Profile

This risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. It is possible that a portfolio stated to have a lower risk profile may in fact fall in value more than a portfolio with a higher risk profile.

The Portfolio is in category 6 as it mostly invests in emerging market shares and similar instruments which typically experience higher levels of price fluctuations than those in developed markets.

The capital is not guaranteed.

### Other Material Risks:

- **Market risk** - the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.
- **Exchange rate risk** - changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. Hedging of this risk may not be fully effective and may increase other risks (e.g. derivative risk).
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.
- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **Emerging markets risk** - emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- **Sustainability risk** - an environmental, social or governance event or condition that could cause the value of the portfolio to go down. Examples of sustainability risks include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.
- **For more detailed information on the risks associated with an investment in the Portfolio, please refer to the section in the Prospectus entitled “Risk Considerations” and discuss with your professional advisers.**

## Charges

The charges you pay are used to pay the cost of running the Portfolio, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken over a year	
Ongoing charges	0.97%
Charges taken under certain specific conditions	
Performance fee	none

Where applicable, the entry and exit charges shown are maximum figures and in some cases you might pay less - please contact your professional advisers for more information.

The ongoing charges figure is based on expenses for the year ending November 2022. This figure may vary from year to year. It excludes transaction costs (including taxes and brokerage commissions) and any borrowing costs, which are payable from the assets of the Portfolio and may impact returns on your investment, and performance fees (where applicable).

**For more information about charges, please refer to the Fund's Prospectus, section entitled "Fees and Expenses" and the relevant supplement for the Portfolio.**

## Past Performance

The Portfolio was launched in December 1997. The share class was launched in April 2016.

Where applicable, past performance has been calculated in GBP and is expressed as a percentage change of the Portfolio's Net Asset Value at each year end (net of all fees). Where past performance is not shown there is insufficient data to provide a useful indication of past performance.

Please be aware that past performance is not indicative of future performance which may vary.

## Practical Information

**Depository:** State Street Bank International GmbH Luxembourg Branch

**Further Information:** The Prospectus, annual and semi-annual reports and latest share price are available free of charge from the Fund's registered office, the Manager, administrator or the Portfolio's distributors. The Prospectus is available in English, French, German, Italian and Spanish.

This document is for a single Portfolio of the Fund and the Prospectus, annual and semi-annual reports is for the entire Fund.

The Fund is an investment company with segregated liability between portfolios under Luxembourg law. Therefore, the assets of the Portfolio you have invested in should not be used to pay the liabilities of other portfolios. However, this has not been tested in other jurisdictions.

**Switching between Portfolios:** Shares are available in other share classes and in other currencies as may be specified in the Prospectus. Shareholders may apply for their shares in any share class of any portfolio to be converted into any share class of another portfolio, subject to the conditions set out in the Prospectus (charges may apply).

**Liability Statement:** The Fund may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.

**Tax Legislation:** This Portfolio's investments may be subject to tax in the countries in which it invests. In addition, this Portfolio is subject to the tax law and regulation of Luxembourg which may have an impact on your personal tax position and impact your investment. For further details, please speak to your professional advisers.

**Remuneration Policy:** Details of the up-to-date remuneration policy of the Manager, including, but not limited to, a description of how the remuneration and benefits are determined and governed by the Manager, are available at <https://www.gsam.com/sm/remunerationpolicy> and a paper copy is made available free of charge upon request.

### BlackRock European Absolute Alpha Fund

Class D Accumulating GBP

ISIN: GB00B4Y62W78

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The investment strategy of the Fund is deemed by the Manager to be capacity constrained and therefore, when the net asset value of the Fund reaches £900,000,000, units in the Fund will not be available to buy until further notice except at the discretion of the Manager (you will still be able to sell your units daily).
- ▶ The Fund aims to achieve positive absolute returns on your investment (i.e. an increase in the overall value of the Fund) over a period of 12 months regardless of market conditions. As such, the Fund will not be managed against any European equity index.
- ▶ The Fund will be managed with the aim of delivering absolute (more than zero) returns on a 12 month basis in any market conditions. However, an absolute return is not guaranteed over a 12 month or any period and the Fund may experience periods of negative return. The Fund's capital is at risk.
- ▶ The Fund aims to gain investment exposure to equity securities (e.g. shares) and equity-related securities of, or giving exposure to, companies incorporated or listed in the European Economic Area and Switzerland.
- ▶ In order to achieve its objective the Fund invests at least 70% of its total assets in derivatives, equity securities and other equity-related securities and when determined appropriate fixed income (FI) securities (such as bonds), money-market instruments (MMIs), deposits and cash.
- ▶ Equity-related securities include derivatives. Derivatives are investments the prices of which are based on one or more underlying assets. MMIs are debt instruments with short-term maturities.
- ▶ The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.
- ▶ At any one time, a substantial amount, or even all of the Fund's assets may be held as cash to provide cover for the exposure created by the use of derivatives or to assist in achieving its investment objective.
- ▶ The investment adviser (IA) will use derivatives to achieve the Fund's investment objective. These will include synthetic short positions where the Fund uses a derivative to benefit from the sale of an asset which the Fund does not physically own with the aim of buying it later at a lower price to secure a profit.
- ▶ The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. 3 Month Sterling Overnight Index Average Rate (SONIA) compounded in arrears plus 11.9 basis points spread should be used by unitholders to compare the performance of the Fund. Compounding in arrears is a methodology that compounds daily values of the overnight rate throughout the relevant term period (i.e.3 Months).
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can sell your units daily. Units, whilst available for purchase, can be bought daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 03 January 2023. This figure may vary from year to year. It excludes:

- Performance fees, where relevant.
- Portfolio trade-related costs, except costs paid to a custodian and any entry/exit charge paid by the Fund to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.91%**
Charges taken from the Fund under certain conditions	
Performance Fee	20.00%#

# 20.00% of any returns that, subject to a high water mark, the Fund achieves above the 3 Month SONIA Compounded in Arrears + 11.9 basis points spread. Further details are available in the Prospectus. For the actual amount charged in the Fund's last financial year, please refer to the Fund's annual report.

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2009. The unit class was launched in 2009.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†13 Month SONIA Compounded in Arrears + 11.9 basis points spread (GBP)

Prior to 13.12.2021, the Fund used a different benchmark which is reflected in the benchmark data.

Historic performance to 31 December 2022

During this period performance was achieved under circumstances that no longer apply.

## Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.

## Janus Henderson

### Absolute Return Fund Class I Acc ISIN: GB00B5KKCX12

A sub-fund of Janus Henderson Investment Fund Series I, a UK OEIC managed by Janus Henderson Fund Management UK Limited.  
Fund Currency: GBP Share Class Currency: GBP

## Objective and investment policy

### Objective

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period, and particularly over the shorter term the Fund may experience periods of negative returns. Consequently your capital is at risk.

Performance target: To outperform the UK Base Interest Rate, after the deduction of charges, over any 3 year period.

### Investment policy

The Fund invests in shares and makes extensive use of derivatives (complex financial instruments) to take both 'long' and 'short' positions in companies the Investment Advisor believes will either rise in value (long positions) or fall in value (short positions) meaning that the Fund may benefit from either scenario. The Fund will hold a significant proportion of its assets in cash and money market instruments as a result of holding derivatives and for when the Investment Advisor wishes to take a defensive stance. Conversely, the Fund may also employ 'leverage' (so that the Fund can invest a greater amount than its actual value) when the Investment Advisor has greater confidence in the opportunities available.

Typically, at least 60% of the exposure to the long and short positions (in aggregate) will be to companies of any size, in any industry, in the UK. Companies may be incorporated or headquartered in the UK, deriving significant revenue from the UK, or constituents of the FTSE All Share Index. Up to 40% of the long and short exposure may be to non-UK companies.

The Fund may also hold other assets including Collective Investment Schemes (including those managed by Janus Henderson).

The Investment Advisor may also use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed and makes reference to the UK Base Interest Rate as this forms the basis of the Fund's performance target and the calculation

of performance fees (if applicable). The Investment Advisor has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

### Strategy

The Investment Advisor blends core long term and tactical short term ideas to construct the portfolio. Ideas come from a variety of sources including proprietary research, external research and other Janus Henderson investment teams, with the intention of taking long positions in companies with unexpected earnings growth or value creation potential, and short positions in companies where earnings are priced in or where long term value is impaired.

**Other Information** The investment manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the investment manager considers could contribute to significant ESG harm, as further described in the prospectus.

**Transaction costs** In addition to the charges set out in the Charges section below, the Fund involves a high level of buying and selling activity and will incur higher portfolio transaction costs which are paid from the assets of the Fund. These may have a material impact on your returns.

**Distribution policy** The Fund offers accumulation shares (shares in which net income is retained within the price).

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

**For an explanation of some of the terms used in this document, please visit the glossary on our website at [www.janushenderson.com](http://www.janushenderson.com).**

## Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

**Equities** Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives and Leverage** The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Exchange Rates** If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Counterparty Risk and Operational Risk** The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

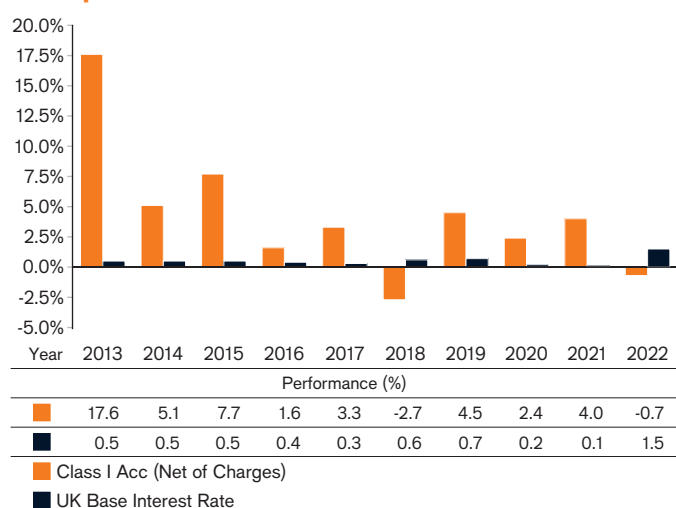

### One-off charges taken before or after you invest\*

Entry Charge	5.00%
Exit Charge	0.00%**

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

## Past performance

### Charges taken from the Fund over a year

Ongoing Charges	1.07%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 31 May 2022. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

### Charges taken from the Fund under certain specific conditions

Performance fee	20.00%*
-----------------	---------

\*20% of any returns that, subject to a High Water Mark, the Fund achieves above the UK Base Interest Rate. The actual amount charged in the Fund's last financial period ending 31 May 2022 amounted to 0.00%.

For more information about Charges please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund and the share class were launched in April 2009.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the benchmark.

## Jupiter UK Special Situations Fund I-Class

I-Class Accumulation Units, ISIN: GB00B4KL9F89

The Manager is Jupiter Unit Trust Managers Limited.

### Objectives and investment policy

#### Objective

The Fund objective is to provide a return, net of fees, higher than that provided by the FTSE All-Share Index over the long term (at least five years).

#### Policy

At least 70% of the Fund is invested in shares of companies that are based in the UK (i.e. are incorporated, headquartered or which conduct a majority of their business activity, in the UK). The Investment Manager seeks to identify special situations where the shares of companies are considered to be undervalued (meaning that their intrinsic value is not reflected in the share price).

Up to 30% of the Fund may be invested in other transferable securities, open-ended funds (including funds managed by Jupiter and its associates), cash, near cash, money market instruments and deposits.

The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

#### Strategy

The fund manager will apply a disciplined, repeatable process to identify shares of companies which the manager considers to be undervalued. Undervalued stocks are those companies whose worth is not believed to be properly reflected by the stock price. The Fund will tend to invest in a smaller number of companies where the manager has the highest conviction.

#### Benchmarks

Target benchmark – FTSE All Share Index

The FTSE All Share Index is an industry standard index and is one of the leading representations of UK stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark – IA UK All Companies Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA UK All Companies Sector.

#### Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

#### Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← | | | | | | | → Typically higher rewards, higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- **Pricing Risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- **Market Concentration Risk (Geographical Region/Country)** - Investing in a particular country or geographic region can cause the value of this investment to rise or fall more relative to investments whose focus is spread more globally in nature.
- **Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund.
- **Liquidity Risk (general)** - During difficult market conditions there may not be enough investors to buy and sell certain investments. This may have an impact on the value of the Fund.
- **Counterparty Risk** - the risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- For a more detailed explanation of risk factors, please refer to the "Risk Factors" section of the Scheme Particulars.

## Charges

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

### Charges taken from the Fund over a year

Ongoing charges	0.76%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

## Legal & General All Stocks Gilt Index Trust Unit Class I GBP Accumulation - ISIN: GB00B8344798

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

### OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index, the "**Benchmark Index**" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Benchmark Index comprises government or other public bonds (a type of loan that pays interest) issued by the government of the United Kingdom (known as gilts) in accordance with the index provider's methodology.
- The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index.
- The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
- The Fund may also invest in government or other public bonds issued by the government of the United Kingdom which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Manager may only hold money market instruments and deposits for liquidity purposes to facilitate the redemption of units and the efficient management of the Fund.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or
  - generate additional capital or income with no, or an acceptably low, level of risk.

#### Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- This Fund may be suitable for investors looking to invest in bonds issued by the UK government (known as gilts), as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

### RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested.

The price for buying and selling units is subject to a Dilution Adjustment See opposite.

### Charges taken from the fund over each year

Ongoing charge	0.15%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at January 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

#### Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.06% for purchases and 0.06% for sales at 02 February 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [www.legalandgeneral.com/chargesandfees](http://www.legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2012.

## PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.

## TB Evenlode Income B Acc

TB Evenlode Income, a sub-fund of the TB Evenlode Investment Funds ICVC B Accumulation, ISIN: GB00BD0B7C49  
The Authorised Corporate Director of this Fund is: T. Bailey Fund Services Limited.

### Objectives and investment policy

The Fund aims to provide income and capital growth over Rolling Periods of 5 years, with an emphasis on income.

At least 80% of TB Evenlode Income will be invested in the equity securities of companies listed in the United Kingdom.

TB Evenlode Income may also invest in equity securities of companies listed globally, fixed income securities, cash (or near cash) and up to 10% in collective investment schemes (which may include schemes managed or operated by the ACD or its associates).

TB Evenlode Income may invest in derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient Portfolio Management").

TB Evenlode Income is actively managed and the Investment Manager focuses on companies which offer a combination of high and growing cash-flows (to deliver both capital growth and dividend growth for TB Evenlode Income) and low business risk. The Investment Manager will perform analysis to identify shares in companies that offer this combination. As part of this analysis, the Investment Manager will consider a company's free cash flow generation. This is a financial measure of how much surplus cash a company is able to generate after funding its operating costs, working capital, capital expenditures, interest and tax. A high level of free cash flow indicates to the Investment Manager that a company has sufficient cash flow to satisfy its obligations, including the ability to provide a sustainable dividend stream.

Investors can redeem units on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK.

For income units, any income received is paid out to you quarterly. For accumulation units, any income received is reflected in the price of units.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

- The Fund is in the above risk category because it invests in shares.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives.
- A limited number of investments may be held which has the potential to increase the volatility of performance.
- The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.87%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	No
-----------------	----

- The maximum ongoing charges figure is 0.90%. Please see the Prospectus for the applicable tiered discounts.
- It excludes payments related to interest on borrowing and portfolio transaction costs, except in the case of transaction fees payable to the custodian.
- Ongoing charges are deducted from capital which will assist the income yield but may constrain capital growth.
- Where an entry charge is imposed, you may not get back the money you invested, even if the value of the Fund hasn't fallen. You should therefore regard your investment as medium to long-term.
- For details of the actual charges, please contact your financial adviser/distributor.

## Past performance

**iShares Japan Equity Index Fund (UK)**

A sub-fund of BlackRock Collective Investment Funds

**Class D Accumulating GBP**

**ISIN: GB00B6QQ9X96**

**Manager: BlackRock Fund Managers Limited**

**Objectives and Investment Policy**

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE Japan Index, the Fund's benchmark index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- ▶ The benchmark index measures the performance of equity securities of leading companies listed in Japan. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index.
- ▶ The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

**Risk and Reward Profile**

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.08%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2005. The unit class was launched in 2012.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†1 FTSE Japan Index (GBP)

As of 31 December 2014, the Benchmark Index converted from a close of business valuation to a midday valuation. Historic performance of the Benchmark has been simulated by the Benchmark provider and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table from 31 July 2009 or from the launch of the share class if later.

**BNY MELLON**  
INVESTMENT MANAGEMENT

# BNY Mellon Long-Term Global Equity Fund

**INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B8K6W529)**

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

## Objectives and Investment Policy

### OBJECTIVE

To achieve capital growth over the long term (5 years or more).

### POLICY

#### The Fund will:

- invest anywhere in the world;
- invest in global equities (company shares), including ordinary shares, preference shares and other equity-related securities; and
- be fully invested at all times, with typically no more than 5% of the portfolio in cash.

#### The Fund may:

- invest in emerging markets;
- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income; and
- invest up to 10% in other collective investment schemes (including but not limited to another Sub-Fund or Sub-Funds of the Company or other BNY Mellon funds).

**Benchmark:** The Fund will measure its performance against the MSCI World NR Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because it includes a broad representation of the asset class, sectors and geographical areas in which the Fund predominantly invests.

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the investment weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

### OTHER INFORMATION

**Treatment of income:** net income from investments will be retained within the Fund and reflected in the value of your shares.

**Dealing:** you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

## Risk and Reward Profile

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 6 because its historical value has shown relatively high volatility. With a Fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

### THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Geographic Concentration Risk:** Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

## Charges

The charges cover the costs of running the Fund, including the costs of marketing and selling. These charges reduce the potential growth of your investment.

### ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST

Entry charge	0.00%
Exit charge	None

*This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.*

### CHARGES TAKEN FROM THE FUND OVER A YEAR

Ongoing charge	0.79%
----------------	-------

### CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS

Performance fee	None
-----------------	------

The ongoing charge is based on expenses calculated on 31 December 2022. This may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid when buying or selling units in another mutual fund.

More information about charges is available in the "Fees and Expenses" section of the Prospectus.

## Past Performance

The chart includes all charges except entry charges.

Fund launch date - 24 August 2007.

Share class launch date - 30 August 2012.

Performance of this share class is shown in GBP.

Performance of the Benchmark is shown in GBP.

Past performance is not a guide to future performance.

## Practical Information

**Documents:** The Fund is a sub-fund (part) of BNY Mellon Investment Funds ("BNY MIF"), an umbrella structure comprising different sub-funds. This document is specific to the Fund and share class stated at the beginning of this document. Copies of the Prospectus, annual and semi-annual reports which are prepared for the umbrella may be obtained free of charge from [www.bnymellonim.com](http://www.bnymellonim.com) or from BNY Mellon Investment Management EMEA Limited, BNY Mellon Centre, 160 Queen Victoria Street, London EC4V 4LA. These documents are available in English, German and Spanish.

**Share price:** The latest share price and other information, including how to buy or sell shares, are available from the website and address given above. Other share classes are offered by the Fund as set out in the Prospectus.

**Switching:** Investors may switch shares in the Fund for shares in other sub-funds of BNY MIF provided they satisfy the criteria applicable to investment in other sub-funds. Further information on switching is contained in the "Switching" section of the Prospectus.

**Legal status:** The assets of the Fund belong exclusively to that sub-fund and may not be used to discharge the liabilities of or claims against any other person or body, including BNY MIF or any other sub-fund within the umbrella.

**Liability statement:** BNY Mellon Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.

**Depositary:** NatWest Trustee and Depositary Services Limited.

**Tax:** The tax legislation of the Fund's domicile may have an impact on your personal tax position. For further details, please speak to an adviser.

**Remuneration Policy:** Details of the up-to-date remuneration policy of BNY Mellon Fund Managers Limited including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits are available on [www.bnymellonim.com](http://www.bnymellonim.com). A paper copy will be made available free of charge upon request.

**Index Providers:** Further information about the index providers is set out under 'Benchmark Provider Disclaimers' in the Prospectus.

**Federated Hermes Asia ex-Japan Equity Fund (the “Fund”)**  
**a sub-fund of Federated Hermes Investment Funds plc (the “Company”)**  
**Class F Stg£ Acc. Shares (ISIN: IE00B8449Z10)**  
**Hermes Fund Managers Ireland Limited (the “Manager”)**

**Objectives and investment policy**

The Fund aims to increase the value of your investment over a rolling period of any five years.

However, there is no guarantee that this will be achieved and your capital is at risk.

The Fund is an actively managed diversified portfolio that will invest at least 80% in shares of companies that are located in or earn substantial revenue from countries in Asia (excluding Japan).

On occasion it may also invest in other financial instruments, for example other funds and rated or Unrated Bonds and Derivatives.

The Investment Manager will consider how well companies manage environmental, social and governance (“ESG”) factors. The companies will either have strong or improving ESG characteristics. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%.

The Fund may borrow on a limited basis (up to a maximum of 10% of the value of the Fund). Leverage is not part of the investment strategy of the Fund.

The Fund’s base currency is USD but its investments may be priced in other currencies. Derivatives may be used to convert the value of those investments into USD.

The benchmark, for performance comparison purposes only, is the MSCI AC Asia ex Japan Investable Market Index.

**You may buy or sell shares in the Fund each business day** (except bank holidays in the UK and Ireland).

**This Share Class is accumulating.** Your portion of any income received will be reinvested. This will be reflected in the value of your shares.

**Useful definitions**

- **Bonds:** A Fixed Income debt investment (also known as ‘Credit’) in which the Fund lends money to a government or company, who is then obliged to pay a specified amount back to the purchaser of the Bond on a given future date. The amount to be repaid usually includes the original amount (the principal) plus interest (coupons).
- **Derivatives:** Investments whose value is linked to one or more underlying assets.
- **Leverage:** Use of various instruments or borrowed money that increases the exposure of the Fund to its investments – this has the potential to increase both the gain and loss of an investment.
- **ESG:** An acronym for ‘Environmental, Social and Governance’ characteristics. A company can be assessed on its management of these considerations.

**Risk and reward profile**

**Narrative explanation of the indicator and its main limitations:**

The value of investments and income from them may go down as well as up and you may not get back the original amount invested.

- Historical data may not be a reliable indication for the future.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean ‘risk free’.
- This reflects volatility of the Fund based on historic movements of underlying investments.

**Particular risks not adequately captured by this indicator include:**

- **Equity Risk:** The value of equities (such as shares in a company) can be affected by market movements. Other influential factors include political and economic news, company earnings and significant corporate events.
- **Currency Risk:** Fluctuations between the share class currency and the base currency of the Fund may negatively affect the value of your investment.

- **Emerging Markets Risk:** Investing in emerging markets carries certain risks, such as: the exchange rates of emerging market currencies are subject to greater fluctuations, there is less publicly available information about companies, and there may be higher inflation and more social, economic and political uncertainty than in developed markets.
- **Counterparty Risk:** If any institutions that provide custody of assets, deposits or counterparty services on financial derivatives for the Fund experience financial difficulties, the Fund may be exposed to financial loss.
- **Leverage Risk:** The use of leverage may result in large fluctuations in the net asset value of the Fund, amplifying either gains or losses.
- **Liquidity Risk:** In difficult market conditions, certain Fund investments may be harder to sell at the last quoted market price.
- **Sustainability Risk:** The fund has environmental and/or social characteristics and so may perform differently to other funds, as its exposures reflect its sustainability criteria.
- **Operational Risk:** The potential loss resulting from error or failure arising from people, systems, controls/safeguards or service providers that the Fund relies on.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Charges taken from the Fund over a year	
Ongoing charge	0.83%
Charges taken from the Fund under certain specific conditions

## Janus Henderson

### Strategic Bond Fund Class I Acc ISIN: GB0007533820

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Janus Henderson Fund Management UK Limited.  
Fund Currency: GBP Share Class Currency: GBP

## Objective and investment policy

### Objective

The Fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period.

### Investment policy

The Fund invests in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments or companies. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The Fund may also hold other assets including bonds of other types from any issuer, preference shares, cash and money market instruments. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target. The investment manager has complete freedom to choose individual investments for the Fund and to vary allocations between different types of bonds.

### Strategy

The investment manager follows a flexible strategy that seeks to deliver total returns (capital appreciation and income) from investments across the entire

spectrum of fixed income assets. Using careful macroeconomic research and credit analysis, the portfolio managers actively vary the allocation to different types of bonds to suit the prevailing economic environment.

**Other Information** The investment manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the investment manager considers could contribute to significant ESG harm, as further described in the prospectus.

**Distribution policy** The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at [www.janushenderson.com](http://www.janushenderson.com).

## Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

**Credit Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

**High Yield Bonds** The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

**Contingent Convertible Bonds (CoCos)** CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares of the issuer or to be partly or wholly written off.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives and Leverage** The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Currency Hedging** When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Charges to Capital** Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

**Counterparty Risk and Operational Risk** The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	0.00%
Exit Charge	0.00%**

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

## Past performance

### Charges taken from the Fund over a year

Ongoing Charges	0.70%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2022. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in October 1986 and the share class was launched in May 2000.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Monument Bond Fund ("the Fund") I Gross Accumulation Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00B4XMPS34. Apex Fundrock Ltd is the Authorised Corporate Director of the Fund ("MI" and "MI Funds" are trading names of the ACD).

### Objectives and investment policy

The Fund aims to provide a competitive level of income whilst maintaining the capital value of your investment.

The Fund will invest in a range of European and Australian asset-backed securities ("ABS") rated at least BBB- or equivalent at the time of investment. These are bonds (debt securities that pay a floating rate of interest) that are backed by specific pools of financial assets including mortgages and other consumer and corporate debt.

On occasions the Fund may be significantly invested in one particular geographical region.

The Fund will aim to reduce the effect of exchange rate movements in the underlying securities relative to the base currency of the Fund. However, hedging techniques may not be fully effective in completely removing the exchange rate risk.

The Fund may use derivative instruments (such as futures, options and interest rate and credit derivatives) for investment purposes. Derivatives are linked to the rise and fall of other assets. The price movements in these assets can result in movement of the Fund's share price.

The Fund can also use derivative instruments for the purposes of efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 3 because funds of this type have experienced low to medium rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- On occasions the Fund may be significantly invested in particular geographical regions, meaning it will have greater exposure to the market, political and economic risks of those regions than if it was more diversified across a wider number of countries.
- There is no guarantee that an asset which provides the security for a bond will maintain its value.
- The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
- Derivatives can be used to help reduce risk but may not be fully successful. Derivatives can also reduce gains you may otherwise have made.
- Currency risk reduction techniques can have an effect on the value of your investment and on the performance of the share class.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.63%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.05%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 30 September 2023.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- 50% of certain charges are deducted from the capital of the Fund. This may allow more income to be paid but it may also restrict capital growth.
- For more information about charges, please see the prospectus.

### BlackRock European Dynamic Fund

Class FD Accumulating GBP

ISIN: GB00BCZRNN30

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long term (5 or more consecutive years beginning at the point of investment).
- ▶ The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies incorporated or listed in Europe, but excluding the United Kingdom.
- ▶ Depending on market conditions, the Fund will invest in equity securities of companies that are, in the opinion of the investment adviser(IA), undervalued (i.e. their share price does not reflect their underlying worth) or have good growth potential.
- ▶ The IA may use derivatives to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the FTSE World Europe ex-UK Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can sell your units daily. Units, whilst available for purchase, can be bought daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 03 January 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.92%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2002. The unit class was launched in 2013.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†<sup>1</sup>FTSE World Europe ex UK Index (GBP)

It is not intended that the performance of the Fund will track the index.

Historic performance to 31 December 2022

## Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at [www.blackrock.com](http://www.blackrock.com) or by calling Investor Services on 0800 44 55 22.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at [www.blackrock.com/Remunerationpolicy](http://www.blackrock.com/Remunerationpolicy) or on request from the registered office of the Management Company.

## Man GLG Undervalued Assets Fund Professional Accumulation Shares (Class C)

(ISIN:GB00BFH3NC99) Man GLG Undervalued Assets Fund (the 'Fund') is a sub-fund of Man UK ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

### Objectives and investment policy

- The Fund seeks to outperform (net of fees) the FTSE All Share Total Return Index ("FTSE Index") over the long-term (over 5 year rolling periods). To achieve this objective, the Fund will invest at least 80% of its assets, directly or indirectly, in UK equities relating to companies that either have their registered office in the UK; carry out a predominant proportion of their business activity in the UK market; and/or are listed on a UK stock exchange.
- The Fund may invest in equities which are not UK equities, American Deposit Receipts ('ADR') and other equity linked instruments including (without limitation) exchange traded or "over the counter" (traded via broker-dealer network) financial derivative instruments (as described below) such as stock options, equity swaps and contracts for differences. The Fund may also invest in transferable money market securities (including certificates of deposit, commercial paper and bankers acceptances), fixed and floating rate government and corporate bonds, bonds convertible into common stock, preferred shares and other fixed income investments. Further, the Fund may hold cash, near cash and other ancillary liquid assets such as time deposits and may use currency transactions, including forward currency contracts, currency swaps and foreign currencies to alter the exposure characteristics of the transferable securities held by the Fund. Fixed income investments may be issued by any government, company or international agency.
- The Investment Adviser uses the FTSE Index as a guide for selecting assets for the Fund, however the Fund is actively managed, meaning that the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective. The Investment Adviser seeks to identify companies trading below the Investment Adviser's estimation of the value of their tangible assets (physical and measurable assets that are used in a company's operations such as property, plant, and equipment) or their replacement cost, or whose profit streams (which focuses on the cash generated for shareholders) the Investment Adviser considers to be undervalued.
- *Use of financial derivative instruments ("FDI")*. The Fund may use FDI extensively to achieve the investment objective and for efficient portfolio management purposes to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- *Benchmarks*. The Fund is managed with reference to benchmarks. The Fund's performance target (as detailed above) has been chosen on the basis that the ACD considers it to set a reasonable performance target for the Fund to achieve, taking into account a number of factors including (for instance) the investment strategy pursued by the Investment Adviser, and the assets in which the Fund will principally invest. Whilst the Investment Adviser may deviate from the FTSE Index, in terms of holdings selection, the index is used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- *Dealing*. Shares can be bought and sold on each Business Day, as detailed in the Fund prospectus.
- *Investment Horizon*: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- *Treatment of income*. Income earned on investments will be added to the value of investors' shares.

### Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

#### The following risks may not be fully captured by the risk and reward profile:

- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options

and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.
- The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- There is no guarantee that the Fund will achieve its investment objective.

A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

## Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	None
<b>Exit charge</b>	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

<b>Ongoing charges</b>	0.90%
------------------------	-------

### Charges taken from the fund under certain specific conditions

<b>Performance fee</b>	None
------------------------	------

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The ongoing charges figure is based on expenses for the year ending 28/02/2023.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

If you switch between different sub-funds of the Company you may pay a switching charge on your subscription to the new sub-fund. This charge may be an amount equal to the entry charge of the new sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

## Past performance

- The Fund was authorised in 2013. This share class was launched on 15 November 2013.
- The past performance chart shows the annual performance, calculated in GBP, for each full calendar year since launch.
- The performance in this table includes all fees and expenses, excluding any entry or exit charges, and shows percentage year-on-year changes in Fund value.
- Please be aware that past performance is not a reliable indicator of, or guide to, future performance.
- The Fund is not an index-tracker and does not seek to track the benchmark shown in the past performance chart. The benchmark performance data is shown for performance comparison purposes only.

## Practical information

- The Fund is a sub-fund of the Company which is an umbrella scheme comprising a number of sub-funds.
- The Bank of New York Mellon (International) Limited is the depositary of the Company. The Fund's assets are treated as being segregated from the assets of other sub-funds of the Company.
- Additional information related to the Fund is located in the prospectus which is produced in an official language of the jurisdictions in which the Fund is registered for public sale. The prospectus is available together with the most recent financial statements, information on other share classes and the latest prices of shares free of charge at [www.man.com](http://www.man.com).
- The Fund is subject to taxation legislation in the UK, which may have an impact on your personal tax position as an investor in the Fund.
- Man Fund Management UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.
- You may switch shares in the Fund for shares in any other sub-fund of the Company. Further information and provisions are in the prospectus.
- Details of Man Fund Management UK Limited's Remuneration Policy are available at [www.man.com/mfm-remuneration-policy](http://www.man.com/mfm-remuneration-policy), including: (a) a description of how remuneration and benefits are calculated; and (b) the identity of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, at Man Fund Management UK Limited at Riverbank House, 2 Swan Lane, London, EC4R 3AD, United Kingdom.
- The Funds are not in any way connected to or sponsored, endorsed, sold or promoted by the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). The LSE Group does not accept any liability whatsoever to any person arising out of the use of the Fund or the underlying data. See: <https://www.man.com/indices-disclaimer> for full disclaimers.

WAVERTON  
INVESTMENT FUNDS

**Waverton Sterling Bond Fund**  
a sub fund of Waverton Investment Funds plc  
The Management Company of the Fund is  
**MJ Hudson Fund Management (Ireland) Limited**

**Class P Stg£**  
**ISIN: IE00BGQYPR94**

## Objectives and Investment Policy

The Fund aims to achieve growth on your investment and income through investment in bonds. The bonds are issued by UK and international governments and companies from any industry sector.

The bonds may have fixed or variable interest rates and will be predominantly rated investment grade or better. A rating agency gives an investment grade rating when it believes that there is a relatively low risk that the issuer of a bond will be unable to make payments. The Fund may invest in bonds priced in any currency but will have a minimum exposure of 80% to British Pounds at all times.

At times, the Fund may hold cash and cash-like instruments.

The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). The Fund may do so for investment purposes or in order to manage the Fund more efficiently (e.g., reducing risks or costs or generating additional growth or income).

The Fund may invest up to 10% of its assets in other funds which have similar objectives and policies to the Fund (or in funds which invest in bonds or money market instruments), of which up to 5% of its assets may be invested in funds investing in bond markets globally.

**For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at [www.waverton.co.uk](http://www.waverton.co.uk).**

You may sell your shares on any working day (generally, a day on which banks in Dublin and London are open).

The Fund declares dividends quarterly (generally, on 31 January, 30 April, 31 July and 31 October each year). Unless you request cash payment, your dividends will be paid in the form of additional shares in the Fund.

The Fund is actively managed and uses the ICE BofA UK Gilt Index (the "Benchmark") for performance comparison purposes only. The fund does not seek to track its benchmark and so has discretion as to the investments it may make. While a proportion of the Fund may be components of, and have similar weightings to, the Benchmark, the Investment Manager may or may not invest in assets which are not included in the Benchmark or with weightings different to that of the Benchmark. There can be no guarantee that the Fund will match or exceed the performance of the Benchmark.

*Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.*

## Risk and Reward Profile

The risk category is based on historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The numerical scale is complex. For example, 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free investment – the risk of losing your money may be small, but the chance of making gains is also limited.

The Fund is in its risk category as shown above as it typically produces higher rewards than other funds (such as money market funds) and is higher risk as a result of investing in bonds worldwide and in the UK.

**Risks materially relevant to the Fund which may not be adequately captured by the indicators:**

- **Investment risk:** the Fund may not achieve its investment objective and the value of shares in the Fund may fall.
- **Credit and settlement risk:** the issuers of bonds or other instruments that the Fund buys, or other parties with whom the Fund trades, may not be able to make payments or deliver instruments to the Fund. As a result, this could lead to a loss.

- **Interest rate risk:** interest rate movements affect the value of bonds. The price of a bond generally falls when interest rates rise. Bonds with a final payment date further into the future (longer maturity bonds) are more sensitive to changes in interest rates.
- **Currency risk:** the Fund invests in assets which are priced in overseas currencies other than the Fund's base currency (British Pounds). Changes in exchange rates may lead to fluctuations in the value of your investment. The Fund may use techniques to try to limit currency exchange risk.
- **Derivatives risk:** the value of a derivative depends primarily on the performance of the underlying asset. A small movement in the value of the underlying asset may cause a large movement in the value of the derivative. The Fund is exposed to the risk that the other party to the derivative will not meet its obligations

**See also the description of risks applicable to the Fund in "Risk Factors" in the Fund's prospectus.**

## Charges for this Fund

These charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charge	0.50%
----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

The ongoing charges figure is based on expenses for the year ending August 2023. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

**For more information about charges, see "Fees and Expenses", "Subscription Price" and "Repurchase Price" in the Fund's prospectus.**

## Past Performance

### Performance in the past is not a reliable indicator of future results.

In general, past performance takes account of all ongoing charges but not any entry, exit or switching charge.

Past performance is calculated in British Pounds.

The Fund launched on 11 January 2010. The class launched on 8 January 2014.

As of 25 May 2022 the benchmark has changed from the iBoxx Sterling Gilts Index to the ICE BofA UK Gilt Index. The past performance data shown in the chart for annual periods up to 2022 relates to the previous benchmark, iBoxx Sterling Gilts Index. The past performance data shown for 2022 reflects the blended return of the iBoxx Sterling Gilts Index ending 24 May 2022 and ICE BofA UK Gilt Index (the current benchmark index) from 25 May 2022.

### Fidelity Index US Fund

a sub-fund of Fidelity Investment Funds

Fidelity Index US Fund P Accumulation Shares  
(ISIN:GB00BJS8SH10)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

The fund aims to track the performance (before fees and expenses are applied) of the S&P 500 (NUK) Index, thereby seeking to increase the value of your investment over 5 years or more.

The fund uses an index tracking (passive) investment approach whereby it aims to replicate the composition of the index. However, for practical reasons and/or to reduce the dealing costs of the fund, it may not invest in every company share in the index or at its weighting within the index.

As well as investing directly in company shares, the fund will achieve exposure indirectly using derivatives, such as exchange traded index futures, for example at the time of cash inflows to remain fully invested or to reduce transaction costs.

Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

To manage the cash position, the fund may invest in other investment types such as liquidity funds (including those managed by Fidelity).

Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.

Shares can usually be bought and sold each business day of the fund.

Note: The S&P 500 index is a product of S&P Dow Jones Indices LLC and has been licensed to FIL Investment Management Limited ("FIL"). The Fidelity Index US Fund is not sponsored, endorsed, sold, or promoted by S&P Dow Jones Indices LLC or its affiliates and neither S&P Dow Jones Indices LLC, its affiliates, or their respective third party licensors make any representation regarding the advisability of investing in such product. S&P 500® is a registered trademark of Standard & Poor's Financial Services LLC and has been licensed to FIL. NUK means Net Total Return (WHT 15%). NUK is a customised index variant, designed and maintained by S&P, which aligns more closely with this fund's withholding tax treatment.

### Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high. Fidelity International's partial swing pricing policy can cause differences in the fund's performance versus the index.

A fund's performance tracking may be affected if the times at which a fund and its benchmark index are priced are different. The fund is priced at midday UK time, and the index is priced when the relevant stock markets close. This can cause apparent differences in the fund's performance versus that of the index than if the fund and the index were priced at the same time.

#### Objectives and Investment Policy

- The objective of the Fund is to achieve income and capital growth over the medium to long term (3 to 5 years plus).
- The Fund invests through a flexible allocation to corporate and government debt securities (which may be investment grade, non-investment grade or have no credit rating) and cash.
- The Fund can potentially be fully invested in cash and near cash instruments depending on market conditions.
- The Fund may use derivatives (complex instruments) for investment purposes and to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund has an active investment approach based on fund manager judgement supported by macroeconomic and credit risk analysis, with an emphasis on valuation, and is not constrained by a benchmark.
- The reference to (UK) in the Fund's name only relates to the Fund's domicile and is unrelated to the Fund's objective and investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.

#### Risk and Reward Profile

- The Share Class is in risk category 3 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

#### Other Risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- The securities that the Fund invests in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds.
- The Fund has the ability to make significant use of financial derivatives (complex instruments) which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. Leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Fund being exposed to a greater loss than the initial investment.
- The Fund may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss.
- As the Fund can rapidly change its holdings across the fixed income and debt spectrum and cash, this can increase its risk profile.
- The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.
- The Fund has the ability to invest more than 35% of the value in Government and public securities issued or guaranteed by a single body.
- The Fund's performance may be adversely affected by variations in interest rates.
- The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.
- A more detailed description of risk factors that apply to this Fund is set out in Section 29 of the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

# Artemis US Smaller Companies Fund (the “fund”)

**Class I accumulation shares, GBP [ISIN: GB00BMMV5766]**

A sub-fund of Artemis Investment Funds ICVC.

The fund is managed by Artemis Fund Managers Limited.

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

## OBJECTIVES AND INVESTMENT POLICY

### Objective

To grow capital over a five year period.

### Investment policy

#### What the fund invests in

- 80% to 100% in shares of smaller companies which, when first acquired, have a market value of less than USD 10 billion.
- Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, and money market instruments.

#### Use of derivatives

The fund may use derivatives for efficient portfolio management purposes to:

- reduce risk
- manage the fund efficiently.

#### Where the fund invests

- United States of America, including companies in other countries that are headquartered or have a significant part of their activities in the USA.

#### Industries the fund invests in

- Any

#### Other limitations specific to this fund

- None

### Investment strategy

- The fund is actively managed.
- The manager uses multiple sources of information, both to generate ideas and to assist in validating and testing candidate companies for investment. This is complemented by techniques such as data mining (examining large databases of information) and financial analysis.
- External research is also used in order to tap into knowledge already available and to look for different views.
- The manager carries out a significant amount of analysis of wider economic trends to understand cyclical and long-term trends and the outlook.

### Benchmarks

- **Russell 2000 TR GBP**  
A widely-used indicator of the performance of US smaller companies, in which the fund invests in. It acts as a ‘comparator benchmark’ against which the fund’s performance can be compared. Management of the fund is not restricted by this benchmark.
- **IA North American Smaller Companies NR**  
A group of other asset managers’ funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a ‘comparator benchmark’ against which the fund’s performance can be compared. Management of the fund is not restricted by this benchmark.

### Other information

- **Dealing frequency:** Normally Monday to Friday except UK public holidays and non-dealing days. Visit [www.artemisfunds.com/non-dealing-days](http://www.artemisfunds.com/non-dealing-days) for more information. Instructions received before 12 noon UK time will be processed at 12 noon on the same day.
- **Distribution policy:** This is an accumulation class. Income received is reinvested in the value of the fund.

## RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund’s future risk profile.
- A risk indicator of “1” does not mean that the investment is “risk free”.

**The risk indicator may not fully take into account the following risks and the following may affect fund performance:**

- **Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The fund’s assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund’s value.
- **Concentration risk:** The fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.
- **Smaller companies risk:** Investing in small and medium-sized companies can involve more risk than investing in larger, more established companies. Shares in smaller companies may not be as easy to sell, which can cause difficulty in valuing those shares.

Please refer to the fund’s prospectus for full details of these and other risks which are applicable to this fund.

## CHARGES FOR THE FUND

### One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

**This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.**

### Charges taken from the fund over a year

Ongoing charge	0.870%
----------------	--------

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. The charges reduce the potential growth of your investment.
- The ongoing charges figure is an estimate rather than a historic figure because this better reflects the expected future charges. The charges may vary from year to year. The exact charges made for each financial year are contained in the fund's annual report.
- The annual management charge is taken from income.

For more information about charges, please see the fund's prospectus, which is available at [www.artemisfunds.com](http://www.artemisfunds.com) or [www.fundinfo.com](http://www.fundinfo.com).

## TwentyFour Corporate Bond Fund

a Fund of TwentyFour Global Investment Funds plc  
**GBP Accumulation Class (IE00BSMTGJ19)**

This Fund is managed by KBA Consulting Management Limited

### Objectives and Investment Policy

#### Investment Objective

The Fund aims to generate a return greater than the median return (the return which is the mid-point between the lowest and highest returns over the relevant term) of the UK's Investment Association's (IA) £ Corporate Bond Sector over the medium to long-term based on a combination of income (income received through its investments such as interest received on bonds) and capital growth (the increase in value/price of investments held by the Fund).

#### Investment Policy

To fall within an IA sector, a fund has to fulfil certain criteria set out by the IA. As at the date of this document, the IA £ Corporate Bond Sector specifications say that to be considered for this sector a fund should invest at least 80% of its assets in sterling denominated (or hedged back to Sterling) investment grade (meaning any investment with a rating of at least Baa3 from Moody's, BBB- from Standard & Poor's, or BBB- from Fitch or higher – these are agencies that rate creditworthiness) corporate bond securities (debt issued by companies). As such, the majority of the Fund's investments will be components of and have similar weightings to the IA £ Corporate Bond Sector. The Investment Manager may use its discretion to invest in securities not included in the IA £ Corporate Bond Sector to take advantage of specific investment opportunities with the aim of outperforming the IA £ Corporate Bond Sector. In addition, the Fund may use the iBoxx GBP Corporate Bond Index as a secondary reference benchmark in marketing materials as against which performance of the Fund may be compared.

While the Fund will primarily invest in investment grade sterling denominated bonds, or bonds denominated in currencies other than sterling but hedged to sterling, it may also invest a portion of its portfolio (but not exceeding 20% of the Net Asset Value (NAV) of the Fund) in high yield issues.

High yield issues (or bonds) are typically considered to have a comparatively higher risk of default than investment grade bonds, and therefore would have a lower credit rating. Investing into these issues will increase the level of risk inherent in the Fund.

Investments will be selected based on:

- (1) how they affect the Fund in meeting the specifications of the IA £ Corporate Bond Sector;
- (2) the Investment Manager's analysis of their potential to provide the Fund with income and/or capital growth; and
- (3) their ability to contribute towards the investment objective. The Fund will not invest in other collective investment schemes.

The Fund may invest in financial derivatives (investments which allow the Fund exposure to an asset through a financial contract rather than investing directly in the asset) to try and reduce the effect of exchange rate movements on the Fund's investments, and to manage risks. A full list of the financial derivatives which the Fund may utilise is set out in section entitled 'Investment Policies' in the supplement to the prospectus.

#### Benchmark

The Fund is actively managed, meaning that investment decisions are made on a discretionary basis. The Fund is managed with reference to the IA £ Corporate Bond Sector for performance outperformance only. Additionally the Fund may use the iBoxx GBP Corporate Bond Index to compare performance only.

#### Investment Horizon

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years. For the full investment objective and policy details, please read the prospectus fully.

#### Income

All income received is reinvested.

#### Fund Currency

The currency of the Fund is GBP.

#### Subscription and Redemption

You can buy and sell shares on any dealing day in London and Dublin.

**For the full investment objective and policy details, please read the prospectus fully.**

### Risk and Reward Profile

The risk and reward indicator illustrates where the Sub-Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Sub-Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

#### Why is this Sub-Fund in this category?

The Fund is currently in category 4 (denoting a lower risk investment) because it invests primarily in bonds which are investment grade.

### Are there any other particular Risks?

**Capital Loss** - the risk that the value of your investment may decrease, and you may not get back the original amount invested.

**Interest Rate Risk** – as interest rates rise, bond prices typically fall. And vice versa.

**Inflation Risk** – if inflation increases, your investment return may decrease

**Credit and Counterparty Risk** – the risk that the issuer of a debt security, or a counterparty to a derivatives contract may not be able to meet interest, principal or settlement payments or otherwise honour its obligations. This would cause losses to the Fund. There is no guarantee that an asset which provides security for a bond will maintain its value.

**Liquidity Risk** – there is a risk that market conditions may affect the Fund's ability to buy or sell assets at the price the Fund would like.

**Currency Risk** – investing overseas can bring about additional returns and spread risk to different markets, but there are risks that changes in currency rates may cause the value of your investment to change. Any currency risk reduction techniques may have an effect on the value of your investment.

**Derivative Risk** – derivatives are complex instruments. We can, and sometimes do, use derivatives to help reduce risk, but we may not be fully successful. Derivatives can also reduce investment gains, and may result in greater fluctuations of the Fund's NAV.

For more information on pertinent investment risks, please read the section entitled 'Risk Factors' in the prospectus.

## Charges for this Fund

One-off charges that may be taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money –	
Charges taken from the Fund over a year	
Ongoing charge	0.56%
Charges taken from the Fund under certain specific conditions	
Performance fee:	none

The charges paid are used to pay the costs of running the fund, including the costs of marketing and distribution. These costs reduce the potential growth of the value of the Fund.

The ongoing charges are annualised and can vary from year to year, are calculated as at 31/12/2022 and exclude performance fee and transaction costs, but include the investment management fee. Full details on the exact charges and costs are published in the annual report of the fund.

More detailed information on charges can be found in the prospectus under the section entitled 'Fees and Expenses'.

## Past Performance

Past performance is no indication of future results. All fund performance data are based on NAV/Share values. Performance is calculated after deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

Past performance is calculated in GBP.

The Sub-Fund was launched on 15/01/2015. The share class was launched on 03/02/2015.

## Practical Information

### Depositary

## Guinness Global Equity Income Fund (the "fund"), class Y GBP Acc, a sub fund of Guinness Asset Management Funds plc (ISIN: IE00BVYPNY24)

The Fund is managed by Waystone Management Company (IE) Limited.

### Objective & Investment Policy

#### Objective

The fund aims to increase the value of the amount you invest in it over a period of years.

#### Investment Policy

The fund invests in a portfolio of global equities providing an above average yield (i.e. a higher yield than the yield of the overall global equity market), however, the fund may also invest, to a limited extent, in other instruments such as government bonds and corporate fixed income securities of investment grade rating.

#### Essential features of the fund:

- Under normal market conditions the fund intends to invest in at least 20 stocks.
- The fund may invest in securities of companies with a wide range of market capitalizations and in companies domiciled throughout the world, including companies domiciled in or traded on Emerging Markets.
- The bulk of the fund's investments will however be concentrated in liquid shares of companies with a market capitalisation in excess of \$1billion.
- The fund is considered to be actively managed in reference to the MSCI World Index (the "Benchmark") by virtue of the fact that it uses the Benchmark solely for performance comparison purposes.
- You may sell your investment on any working day in Ireland.
- Any income the fund receives will be reinvested to grow the value of your investment.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within five years.

### Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Please note that even funds with the lowest rank may lose you money.
- In addition to the level of risk shown by the indicator, there are other risks associated with this fund, as detailed below:
- The fund invests mainly in shares, and the value of these may fall or rise due to a number of factors, including the performance of the company and general stock market and exchange rate fluctuations. The value of your investment may rise or fall and you could get back less than you invest.
- Sustainability Risk - The fund may be subject to sustainability risk, meaning an environmental, social or governance ("ESG") event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## Charges

The charges you pay are used to pay the costs of running the fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5%
Exit Charge	None
Charges taken from the fund over a year	
Ongoing Charges	0.79%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The entry and exit charges shown are maximum figures. This is the maximum that might be taken out of your money before it is invested and before proceeds of your investment are paid out, respectively. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at December 2022. This figure may vary from year to year. It excludes portfolio transaction costs.

For more information about charges please see Section 3 of the Fund's prospectus which is available at <https://www.guinnessgi.com/literature#tab-regulatory-documents>

## Past Performance

■ Guinness Global Equity Income Fund class Y GBP Acc ■ MSCI World Index

- The graph shows annual performance in GBP for the fund with a launch date: 11/03/2015
- Past performance is not an indicator of future performance.
- Performance is after taking account of the ongoing expenses of the fund but does not reflect the impact of any entry or exit charge.
- The Benchmark (MSCI World Index) is not used to define the portfolio composition of the fund or as a performance target and the fund may be wholly invested in securities which are not constituents of the Benchmark.

## SPECIAL SITUATIONS FUND

KEY INVESTOR  
INFORMATION  
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the I Acc class (ISIN: GB00BG0J2688). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

### Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

### Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 90% of its assets in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus for further details.

### Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk). The Fund is dual priced; it has an offer (buying) price and a bid (selling) price and the difference between these (bid-offer spread) is dependent on the underlying holdings. This means the price investors buying and selling receive is reflective of the underlying transaction costs related to the subscription or redemption to avoid any dilution in the fund's value for existing investors. For a fuller explanation, please visit [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
  - Intellectual property
  - Strong distribution channels
  - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management and main board directors. Companies are also assessed for employee ownership below the senior management and board and changes in equity ownership are monitored.

## Risk and reward profile

Lower Risk Typically lower rewards

Higher Risk Typically higher rewards

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The SRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of

derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.

- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## WS Ruffer Diversified Return Fund (the "Fund"), I Accumulation, a fund within WS Ruffer Managed Funds (the "Company") (ISIN: GB00BMWQLQW82)

Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

### Objective and investment policy

#### Objective

To achieve a positive return (an increase in value of the fund) with a focus on capital preservation in all market conditions after all costs and charges have been taken, over any 12 month period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

#### Investment Policy

To invest globally, including emerging markets (which are countries whose economies are progressing towards becoming advanced) in the following asset classes: equities (company shares), bonds (loans to either a company or government that usually pay interest), alternative investments (property and precious metals), money market instruments (which are short term loans that pay interest) and cash. As part of the equity exposure, the fund may invest in Investment Trusts. Investment in open-ended funds is limited to 10% of total assets by value.

The Investment Manager seeks to create a balanced portfolio by investing in both protective assets, such as bonds, derivatives and cash, and growth assets, such as equities. The Investment Manager seeks to identify opportunities where the potential rewards outweigh the potential risks through analysis of a company's markets, product/service offering, competitive position, financial strength and competence of its management.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund may invest in other funds (including those managed by the Manager, the Investment Manager and their associates).
- The fund will not invest directly in alternative assets, but by using for example other funds.
- The fund can invest across different geographic regions, industry sectors and market capitalisations without limitation.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used for investment purposes and to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of the fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Changes in Interest Rate Risk: A rise in interest rates generally cause bond prices to fall.
- Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
- Liquidity Risk: The fund may invest in assets where, in difficult market conditions, there is an increased risk that a position cannot be bought or sold in a timely manner or at a reasonable price and the Manager may suspend dealing in the fund.
- Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.
- Alternative Investment Risk: The fund may invest in other investment vehicles to gain indirect exposure to alternative assets such as property and precious metals. Exposure to such investments can involve a higher degree of risk that may increase the risk of investment loss. The performance of such vehicles can be volatile and there is a risk that investors may experience a delay in receiving redemption proceeds.
- For more information about the fund's risks please see the Risk Factors section of the prospectus which is available at [www.waystone.com](http://www.waystone.com).
